

We don't build, we create

Corporate Philosophy

Elegant | Everlasting | Economical

We believe in fostering a culture of innovation and embracing change. Our philosophy is continuously exploring new ideas, technologies, and processes to stay ahead of the curve and deliver cutting-edge solutions. We endow this through collaboration and teamwork by nurturing an environment where individuals work together, share knowledge, and leverage their diverse skills and perspectives to achieve common goals. Striving to create innovative and inspiring spaces seamlessly blending functionality, aesthetics and sustainability. As our company continues to evolve and grow, these core values remain constant.

“We offer to elevate your space with better, more functional interior and exterior solutions.”

Brand Concept

PROMISE

[Redesigning India one state at a time]

We promise to transform ordinary spaces into extraordinary environments to reflect clients' unique identities and aspirations that inspire and uplift spaces, enhancing the quality of life and leaving a lasting positive impact.

VISION

[Enhancing India one state at a time]

Our vision is to have a global impact, shaping skylines, communities, and cultures with our architectural designs and contributing to the advancement of the architectural industry.

MISSION

[Businesses must remain focused on producing value]

Our mission is to offer cutting-edge and dependable Exterior and Interior solutions "Made In India" that improve buildings' strength and beauty. In every product we manufacture, no matter the scale, we seek to create objects and spaces that resonate with the individual.

As the Chairman, I am committed to fostering an environment where innovation thrives, collaboration flourishes, and every individual has the opportunity to grow and excel. Together, we have the power to create exceptional designs that leave a lasting impact on our clients and communities. So let us continue to support one another, communicate openly, and share our knowledge to achieve our collective goals.

Mr Sanjay Garg
Chairman

CORPORATE OBJECTIVES WE ASSURE BEST QUALITY

Excellence: We are committed to invest in our employees' development and growth. By nurturing their workforce, we drive innovation, enhance productivity, and foster a positive work environment.

Integrity: We prioritize ethical conduct throughout our operations through honesty, fairness, respect for partners & employees, and compliance with legal and regulatory requirements.

Elegance: We aim to create products and services that are visually appealing, well-designed, budget and user-friendly. This includes aesthetically pleasing details, sleek and intuitive interfaces, and an overall sense of sophistication in the product's appearance.

Quality: At E3 quality objectives are set to ensure that the company consistently meets & exceeds customer expectations, enhances customer satisfaction, and maintains a competitive edge in the market.

Economical: E3 focuses on achieving efficiency, cost-effectiveness, and optimal resource utilization. Through set objectives to control and reduce costs across our operations we promise to deliver best 'Made in India' products.

OUR JOURNEY TOWARDS INNOVATION

E3 Group, with years of exceptional experience, is setting high standards in the market. Initially, we started as a single plywood firm in New Delhi. From just a plywood firm covering 600sqft, E3 transformed into India's leading manufacturer of interior and exterior products with dealers and distributors in PAN India. E3 believes in Made in India world-class quality products by "Delivering promise and exceeding expectations". It has helped us to design & deliver contemporary products that have become synonymous with modern living. E3 Group produces eco-friendly products to save earth's green lush which is also the perfect replacement of wood.

PVC EDGE BAND MANUFACTURING PLANT

We are one of the most well-known edge band producers in the business. It is the largest of our manufacturing facilities, with a floor area of over 2 lac square feet, and is located in Noida, Uttar Pradesh. Its daily production capacity is 5 lac meters, with infinite tones, hues, patterns, and on-demand colors and sizes with dealers, distributors, and warehouses in PAN India.

ACP / HPL MANUFACTURING PLANT

E3 is the largest manufacturer of ACP in India. Its manufacturing plants are located in Uttarakhand, Andhra Pradesh, Uttar Pradesh, Himachal Pradesh and coming soon with a new plant in Greater Noida. With a production capacity of 4 million sq.mt. per annum, E3 is the first to establish an ACP manufacturing plant in South India.

CLADS SEAMLESS PANELS MANUFACTURING PLANT

Located in Greater Noida, UP Clads manufacturing unit has a production capacity of 3.5 million sqft per annum. Our Interior & Exterior Clads and Mouldings are designed with 100% tested and certified material and are available in wide variants of elegant collections to fit architectural and design requirements.

DECORATIVE LAMINATES MANUFACTURING PLANT

We are the first manufacturer in India to produce laminated matching edge bands. The plant, which is 1,80,000 square feet in size and is located in Hapur, Uttar Pradesh, produces 40 lac laminate sheets each year that are 100% phenolic and urea free. We aim to introduce premium, exclusive European paper laminates made in India.

ARTIFICIAL GRASS MANUFACTURING PLANT

With new and enhanced variants, Artificial Grass has swayed the entire Indian industry. The production facility is located in Greater Noida, Uttar Pradesh, produces 15 million sq. ft. per year with more than 100 distributors in India. The yarn is made safe for children and animals using chemicals like PP and LLDPE resins.

PVC LAMINATES MANUFACTURING PLANT

We are India's first and largest producer of PVC laminates. Our manufacturing facility, located in Greater Noida, Uttar Pradesh, can produce 1.5 million sheets annually with more than 500 different designer laminates throughout India. The PVC laminate brands of E3 are Sky Decor, Mozaic, and Imperia.

POLYCARBONATE SHEET MANUFACTURING PLANT

E3 is the largest producer of polycarbonate sheets. Our Greater Noida, UP manufacturing facility produces 4500 tonnes of polycarbonate sheets each year. We were the first company to introduce an eight-foot-wide sheet in India with the brand names UVLITE and Imperia, a subsidiary brand of UVLITE.

QUALITY TEST & CERTIFICATIONS:

Uncompromising Quality, Unparalleled Service

E3 group has achieved several credible certificates from regulatory bodies like the ARAI test certificate, ISO certificate, IIT Bombay test certificate, and other prestigious certificates of guaranteed quality. The authorized testing department manufactures and tests all products per strict protocol. The Research and Development department is dedicated to continuously developing new Make in India product variants while upholding the highest quality standards.

GROUP BRANDS:

Powering Progress, Together

E3 Group Brands is regarded as top-notch by every architect, interior designer, and carpenter in the country. By establishing a trend and benchmark for quality, styles, variety, etc., all the brands guarantee going above and beyond what the market expects.

UNITS:

OKHLA, DELHI | MUNDKA, DELHI |
GURGAON | JAIPUR | GHAZIABAD | NOIDA

E3 Group's passion for wood as a natural raw material is the driving force behind introducing a substrate for laminate flooring and interiors, medium-density fiberboard (MDF), which is largely utilised in the furniture business. Due to the homogenous structure of the MDF board, it provides a smooth surface and strong bending strength appropriate for a wide range of applications.

Medium Density Fireboard (MDF) panel is a type of engineered wood product that is commonly used in construction and interior design applications. It is created by breaking down wood fibers or particles, combining them with a resin binder, and then forming them into panels through a high-temperature and high-pressure process.

The term "medium density" refers to the density of the MDF panel, which falls between the two other main types: low-density and high-density MDF. Medium-density fireboard strikes a balance between the two, offering a good combination of strength, smoothness, and versatility.

HDF

HDF typically refers to High-Density Fiberboard. High-Density Fiberboard is a composite material commonly used in construction and interior design. It is made from wood fibers, typically obtained from hardwood or softwood residuals, which are combined with a binder and compressed under high pressure to form dense panels.

HDHMR

High-Density High Moisture Resistance board. It is a type of engineered wood product specifically designed for applications that require resistance to moisture and high-density characteristics. HDHMR is widely used in the construction and interior design industry due to its durability and versatility.
